IFS Component ...

Financial

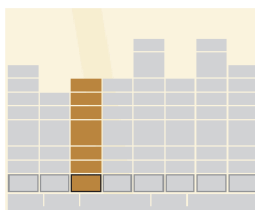

IFS Financials provides a comprehensive overview of your business to give you the kind of information you need to make well-informed business decisions and to take advantage of new business opportunities. IFS financial streamline your accounting process, enabling you to strengthen controls at all levels of the organization. In addition, you can zoom in, quickly and easily, on critical details, all the way down to the transaction level. Tightly integrated with IFS Business Performance, the financial modules provide a comprehensive solution for your entire financial needs.

eBusiness

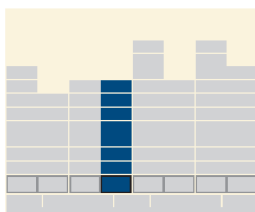

IFS eBusiness uses web-based technology to create and enhance relationships through-out your company. Your employees, customers, suppliers and partners get personalized, accurate information-when and where they need it-through easy-to-use portals. IFS eBusiness ensures security, performance, and scalability and integrates with internal and external systems using web services.

Sales and Service

IFS Sales & Service is an integral part of IFS customer relationship management (CRM) solution. It helps you business maximize its profitability over the entire customer lifecycle-from the sales lead through the entire sales cycle, and ongoing service and support. Your field service technicians can use wireless technology and web-based portals to manage all the information necessary for accurate invoicing, such as time, parts and mileage.

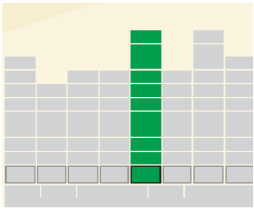

Engineering

IFS Engineering provides the cornerstone of any product lifecycle management (PLM) solution or asset lifecycle management (ALM) solution. By helping you improve product quality and reduce time-to-market, you can significantly increase revenues and minimize costs. IFS Engineering makes it easier to specify and configure design elements and products. And by using it in conjunction with IFS document Management, you can ensure that the right information gets to the right people at the right time, avoiding confusing, unnecessary delays and costly errors.

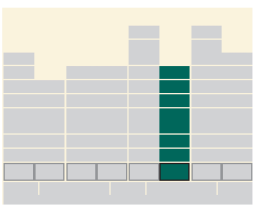

Manufacturing

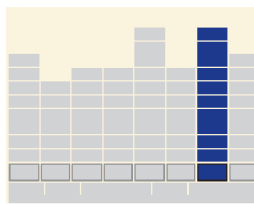

IFS Manufacturing helps maximize profitability by giving you more control over your production process. IFS solution combines a simple, highly automated flow for the many routine tasks in the process with advanced management by exception for the vital few. A powerful mixed-mode solution, it supports planning, execution, control and analysis for most types of manufacturing, in all phases of the process, and for all the employees' within your organization. Tightly integrated with IFS Distribution, IFS Manufacturing supports the use of back-to-back demand-to-supply orders.

Distribution

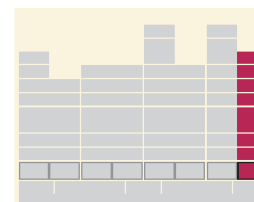

IFS Distribution is a fundamental part of the IFS supply Chain Management (SCM) solution. It gives you bottom-line results by improving demand planning, minimizing inventory, enhancing customer service, and reducing order-to-delivery time. IFS solution is easy to use, highly adaptable and enables real-time communication throughout the supply chain. It fully supports a company's global operations, streamlining your workflows.

Maintenance

IFS Maintenance is a comprehensive, industry-leading solution that improves your bottom line by maximizing your return on capital assets. With advanced technology, it provides better control over your repair, overhaul and preventative maintenance planning and scheduling. OLE for Process Control (OPC) manages the interaction with automation equipment from different vendors. It also optimizes your supply chain; efficiently facilitating collaboration between suppliers and customer's so you can focus on your core business and manage your customer relationships.

Human Resources

IFS Human Resources is a strategic human resources planning tool for improving your Company's productivity and boosting the bottom line. With it, you can optimize your human resources process including workforce sourcing and acquisition, training and development, benefits and compensation management, and payroll. Our user- and task-based design concept saves both time and money by providing a wide range of tools that streamlines your HR processes, including a web-based Manager and Employee Self-Service tool-kit.

IFS' industry solutions are based on the functional breadth of IFS Applications, with the addition of cutting-edge features and packaged industry know-how. This gives our customers the tools and processes that they need to set them apart from the competition and delivers fast payback on their investment.

IFS' component-based approach delivers business agility to our customers. Implementing step-by-step allows an immediate focus on hot business issues and the areas which bring competitive advantage. By adding industry-specific components we offer strengthened vertical market functionality while maintaining an easy-to-use core solution.

At IFS we focus on seven major industry groupings – with additional functionality for the sub-verticals in these areas - plus cross-industry processes which benefit all. The security capabilities demanded by the Defense industry, the safety aspects needed in the Nuclear industry and the project-focus required in Construction are just some examples of how our cutting-edge industry-specific functionality enriches IFS Applications for all businesses.
